

Pre-Connection Requirements

Prior to starting construction, a scheduled site visit must be arranged with the inspector to determine what site preparations, materials and permits will be needed for your individual connection. You **must** contact this office to schedule an inspection of all connections at least **48 hours in advance** of pushing any pipe. You must also complete the enclosed connection application and permit form and return them to this office along with \$50.00 Application fee. You will not be permitted to connect to the water/sewer system until the permit has been approved by this office.

Please be advised that the owner will be responsible for the installation of any water or sewer appurtenances necessary for service to the property, for obtaining all necessary permits, and for the payment to the Commissioners of all associated inspection fees. The owner shall guarantee the construction for a period of two (2) years from final acceptance by the Department.

Remember: You **must** call Miss Utility at 800-441-8355 at least **48 hours** in advance of digging.
